

FundFlow — Admin Operations Guide

Administrator one-pager · Print or use as a 6-slide deck

Slide 1 — Account layers

Layer	Purpose
Master Bank	Imported statement lines (source of truth for the real bank)
Master Cash	Pool cash on hand; must equal sum of all member cash
Master Fund	Total pool value; must equal sum of all member fund
Member Cash / Fund	Per-member balances
Loan sub-account	Principal tracking per loan

Rule: Every member cash/fund movement has a matching master leg in the same transaction.

Slide 2 — Deposits (Path A: Fund Posting)

Step	Action	Result
1	Member submits deposit	Pending fund posting
2	Accept posting	CR master cash + CR member cash
3	—	Uncleared bank line created
4	Import CSV when available	Statement line appears
5	Clear / Match	Links ledger to bank; no extra journal

Auto-collection may run after accept if contributions or EMIs are due.

Slide 3 — Bank import (Path B: Statement first)

Step	Action	Status
1	Import CSV	imported
2	Mirror to cash	mirrored — master bank + master cash
3	Post to member	posted — member cash credited
4	Auto-collection	Contributions / EMIs if due

Do **not** combine Path A and Path B for the same deposit (double-count risk).

Slide 4 — Contributions & collection

Collection journal (each cycle):

- DR member cash + DR master cash (mirror)
- CR member fund + CR master fund (mirror)

Situation	System behaviour
Full cash available	Full collection on cycle open or deposit
Partial cash	Partial collection; remainder PENDING/OVERDUE
Late	Late fee tiers after grace window

Slide 5 — Loans & cash-out

Disbursement (ledger only):

- DR member fund + master fund (mirror) — member + master portions
- DR loan account (principal)
- CR member cash + master cash (mirror)
- **No bank payout at disbursement**

Cash-out (bank payout):

- Member requests → admin **accepts**
- DR member cash + master cash (mirror)
- Uncleared bank line → **Clear/Match** when transfer appears on statement

Repayment: Cash-in mirror → cash debit → fund credit → loan principal credit.

Slide 6 — Admin checklist

Task	Where	Watch for
Accept deposits	Fund Postings	Match uncleared lines after import
Import bank CSV	Bank Accounts → Statement lines	Duplicates blocked by hash
Mirror / Post	Statement lines	Only imported / mirrored rows
Approve cash-outs	Cash-out requests	Member cash amount
Loan queue	Loans	Guarantor required; overrides logged
Reconciliation	Nightly batch	MASTER_DRIFT, MEMBER_DRIFT exceptions
Legacy migration	Legacy Migration	Run accounting:rebuild-balances if cash drift suspected
Fund-only loans	Loans	100% member fund + zero settlement → no EMI schedule
