

Member edit page — detail insights widgets

Compact, modern insights on the **Edit member** page (`{record}/edit`), styled like the membership applications insights (`ff-app-insights`: gradients, KPI strip, 2–3 column grids).

Members are managed only on the edit page (no separate view page). Table links and widgets route to `MemberResource::getUrl('edit', ...)`.

Layout overview

The widget renders **above** the membership form and relation-manager tabs (same pattern as account and loan detail pages).

1. **Lifecycle stepper** — Joined → Active → Cycle → Loan / Arrears when relevant
2. **Hero alert** — Contextual message (good standing, ready to contribute, arrears, active loan, etc.) with optional CTA
3. **Cash & fund balance cards** — Gradient tiles linking to each account view
4. **Six KPI tiles** — Cash, fund, monthly amount, cycle status, loan due, posted count (+ cash-activity sparkline)
5. **Open cycle panel** — Period, required cash, fund-vs-monthly progress bar, link to contribution cycle
6. **Loan or eligibility panel** — Active loan with repayment progress, or loan eligibility summary
7. **Arrears banner** — When overdue installments or unpaid contribution periods exist
8. **Quick-link cards** — Accounts, contributions, loans, household
9. **Six-month contribution chart + recent ledger activity**
10. **Household strip** — Parent link and dependents when applicable

Header actions (edit page)

- **Contribute** — Primary action when applicable
- **Household** dropdown — Allocate to dependents
- **Delinquency** dropdown — Sync status, mark delinquent, restore active, open delinquency workspace

Page heading: member name. Subheading: **MEM-####** · Status.

Key files

Purpose	Path
Snapshot data	<code>app/Services/MemberDetailInsightsService.php</code>
Livewire widget	<code>app/Filament/Tenant/Widgets/MemberDetailInsightsWid</code>
Blade UI	<code>resources/views/filament/tenant/widgets/member-deta</code>
Lifecycle stepper	<code>resources/views/components/member-lifecycle-stepper</code>
Edit page wiring	<code>app/Filament/Tenant/Resources/Members/Pages/EditMem</code>
Member links in tables	<code>app/Filament/Support/MemberTableColumns.php</code>
Delinquency header actions	<code>app/Filament/Support/MemberDelinquencyActions.php</code>

Purpose	Path
Contribution header actions	<code>app/Filament/Tenant/Resources/Members/Concerns/InteractsWithConcerns.php</code>
List-page insights (unchanged)	<code>app/Services/MemberInsightsService.php</code> , <code>MemberInsightsWidget</code>

Refresh behavior

- Widget polls every **30s** on the edit page
- Refreshes after **Save** on edit (`MemberResource::dispatchMemberDetailInsightsRefresh`)
- Refreshes after a successful **Contribute** header action
- List-page `MemberInsightsWidget` still refreshes via `dispatchInsightsRefresh` on create

Tests

- `tests/Unit/MemberDetailInsightsServiceTest.php` — Snapshot shape, balances, KPIs, trend, sparkline
- `tests/Feature/Tenant/EditMemberPageTest.php` — Edit page loads with form and tabs
- `tests/Feature/Tenant/MemberTableColumnsTest.php` — Edit URLs for column links
